

Open position for a Production Technician (M/F)

Career opportunity for a young and skillful multi-disciplinary technician willing to contribute to the growth of a niche Swiss Company located in the Italian-speaking Canton Ticino.

SENSOPTIC develops, manufactures and sells worldwide precision optical sensors and computer-controlled systems for quality control of wires and filaments in production plants.

What you will do

- take care of the complete production chain of sensors: supply and logistics of components, assembling operations, documentation, calibration, quality control, testing and packaging
- contribute to the design and manufacturing of working stations and new products

What we offer

- challenging and varied activities in a dynamic and flexible environment
- continuous in-house training, excellent working conditions and competitive salary

Your skills and experience

- Technical degree in micro-mechanics or equivalent education
- Proven manual skills in precision assembling operations
- comfortable using microscopes and PC applications
- Willingness to learn and ability to work independently
- Good communication and all-round troubleshooting skills
- At least five years of experience in industry
- Knowledge of English or German language is an asset
